

# Starting Point for the Future: The World in 2016

Robert Pepper  
Vice President  
Global Technology Policy

Beyond Broadband  
17 April 2012

# Global Internet Users by Region, 2015

By 2015, there will about 3 (4) B Internet Users

Source: Cisco Visual Networking Index (VNI) Global IP Traffic Forecast, 2010–2015

By 2016, there will be 1.4 mobile connections (devices and M2M) per capita.

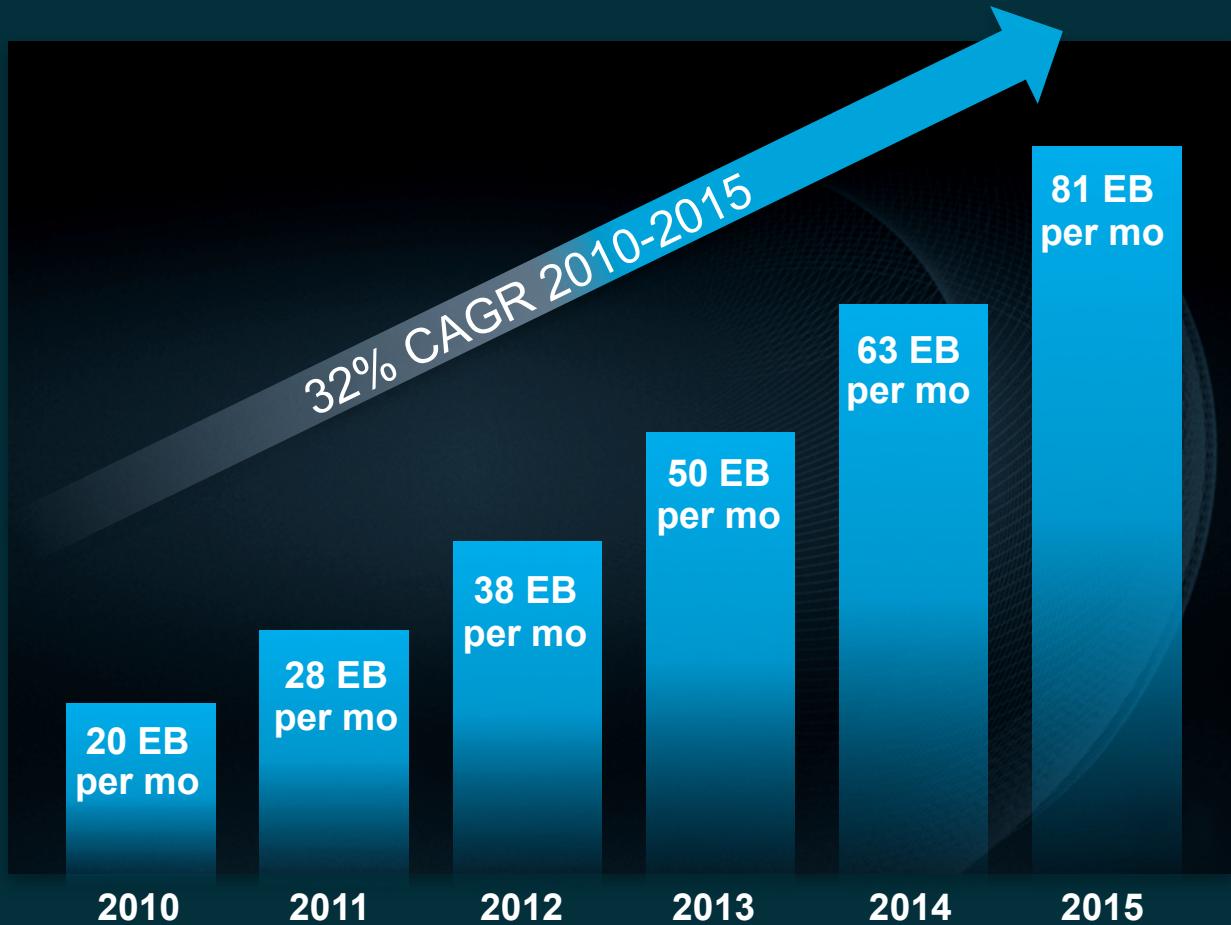

There will be more than 10B mobile connections (devices & M2M nodes) and 7.3B people.\*

\* *United Nations 2016 Global Population Estimate*

# Entering the Zettabyte Era

## Global IP traffic will increase 4-fold from 2010 to 2015

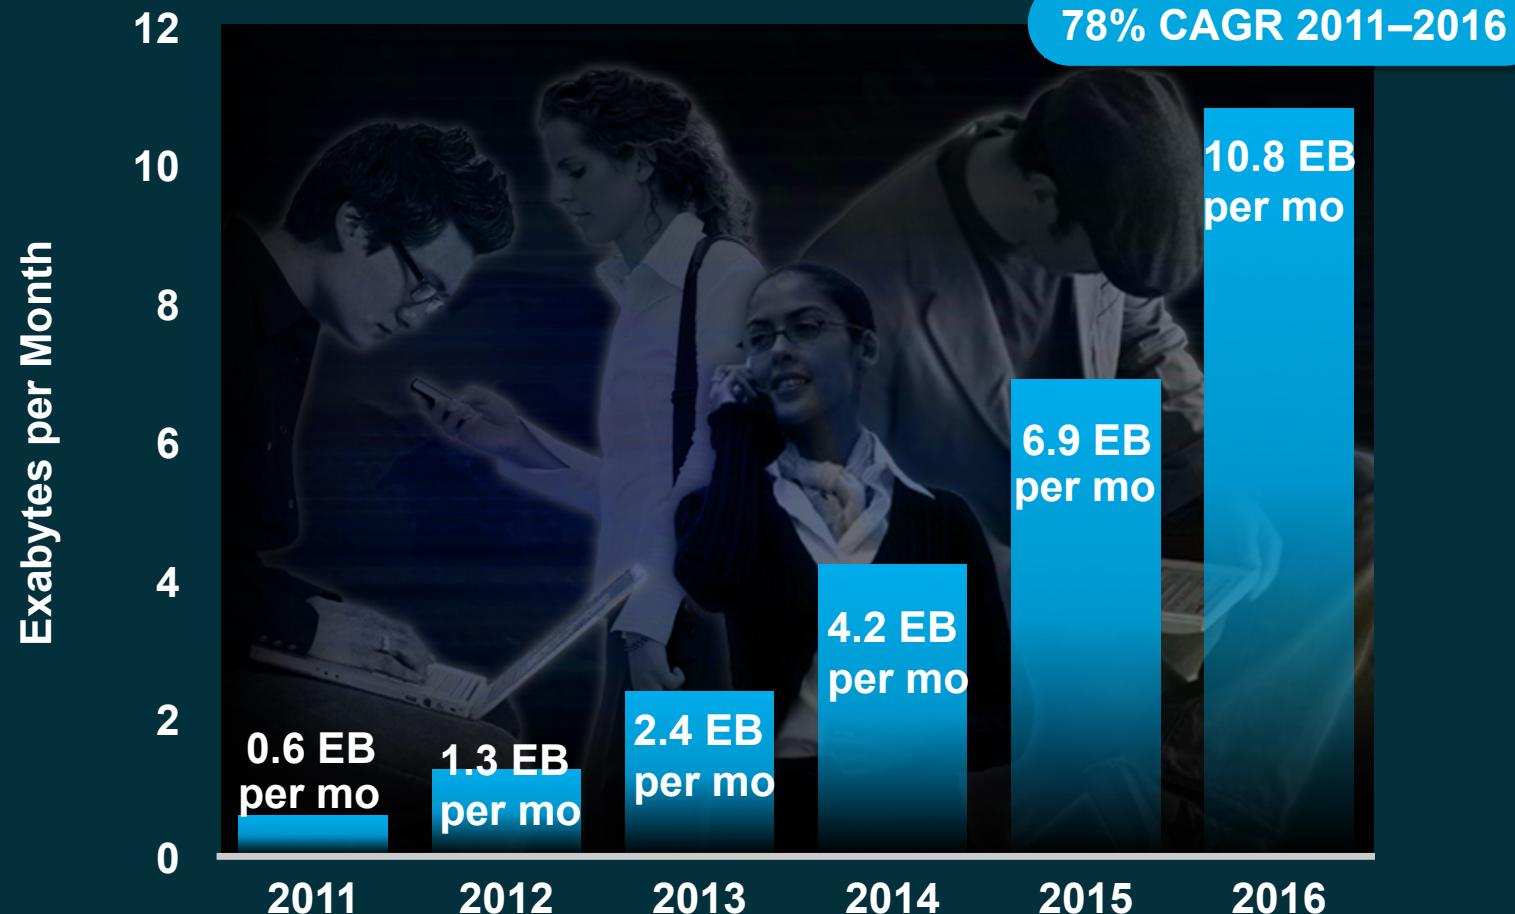

Source: Cisco Visual Networking Index (VNI) Global IP Traffic Forecast, 2010–2015

# Global Mobile Data Traffic Growth

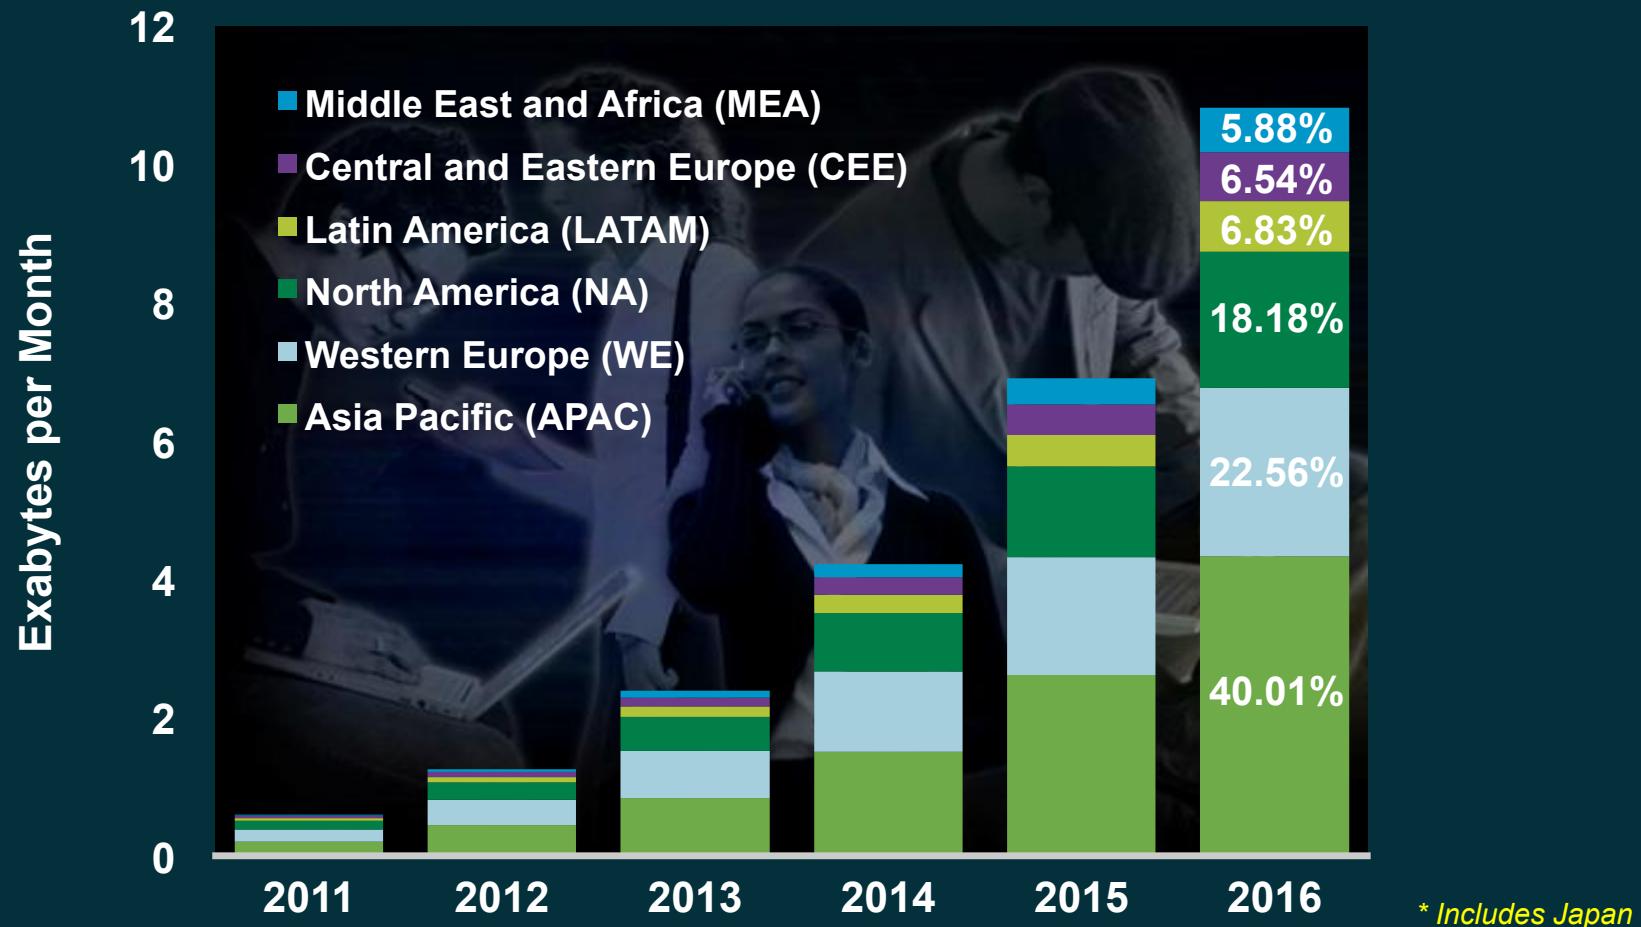

Global Mobile Data Traffic will Increase 18X from 2011 to 2016

Source: Cisco Visual Networking Index (VNI) Global Mobile Data Traffic Forecast, 2011–2016

# Global Mobile Data Traffic Growth / Regions

MEA has the Highest Growth Rate (104%) from 2011–2016  
APAC\* will Generate 2/5<sup>th</sup> of all Mobile Data Traffic by 2016

Source: Cisco Visual Networking Index (VNI) Global Mobile Data Traffic Forecast, 2011–2016

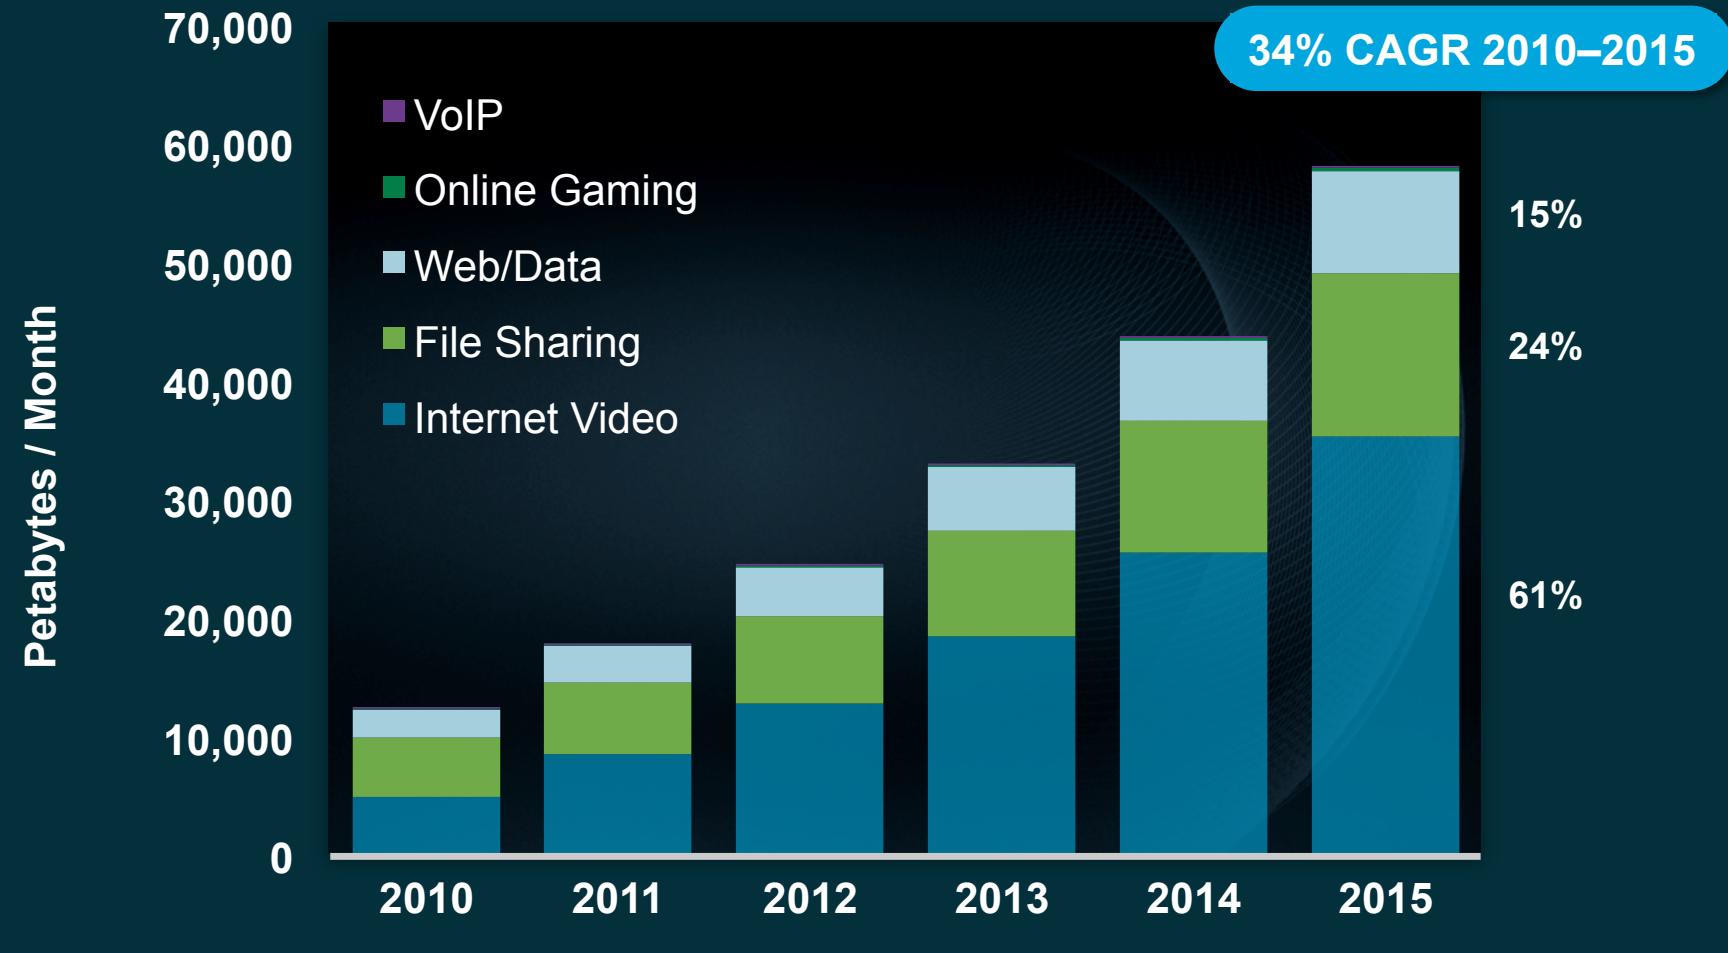

By 2016, **60 percent** of mobile users (3 billion people) will consume/generate at least one gigabyte of mobile data traffic per month.

In 2011, **0.5 percent** of mobile users consumed/generated 1 GB/month

# Global Consumer Internet Traffic / Applications

## Internet Video dominates consumer Internet traffic

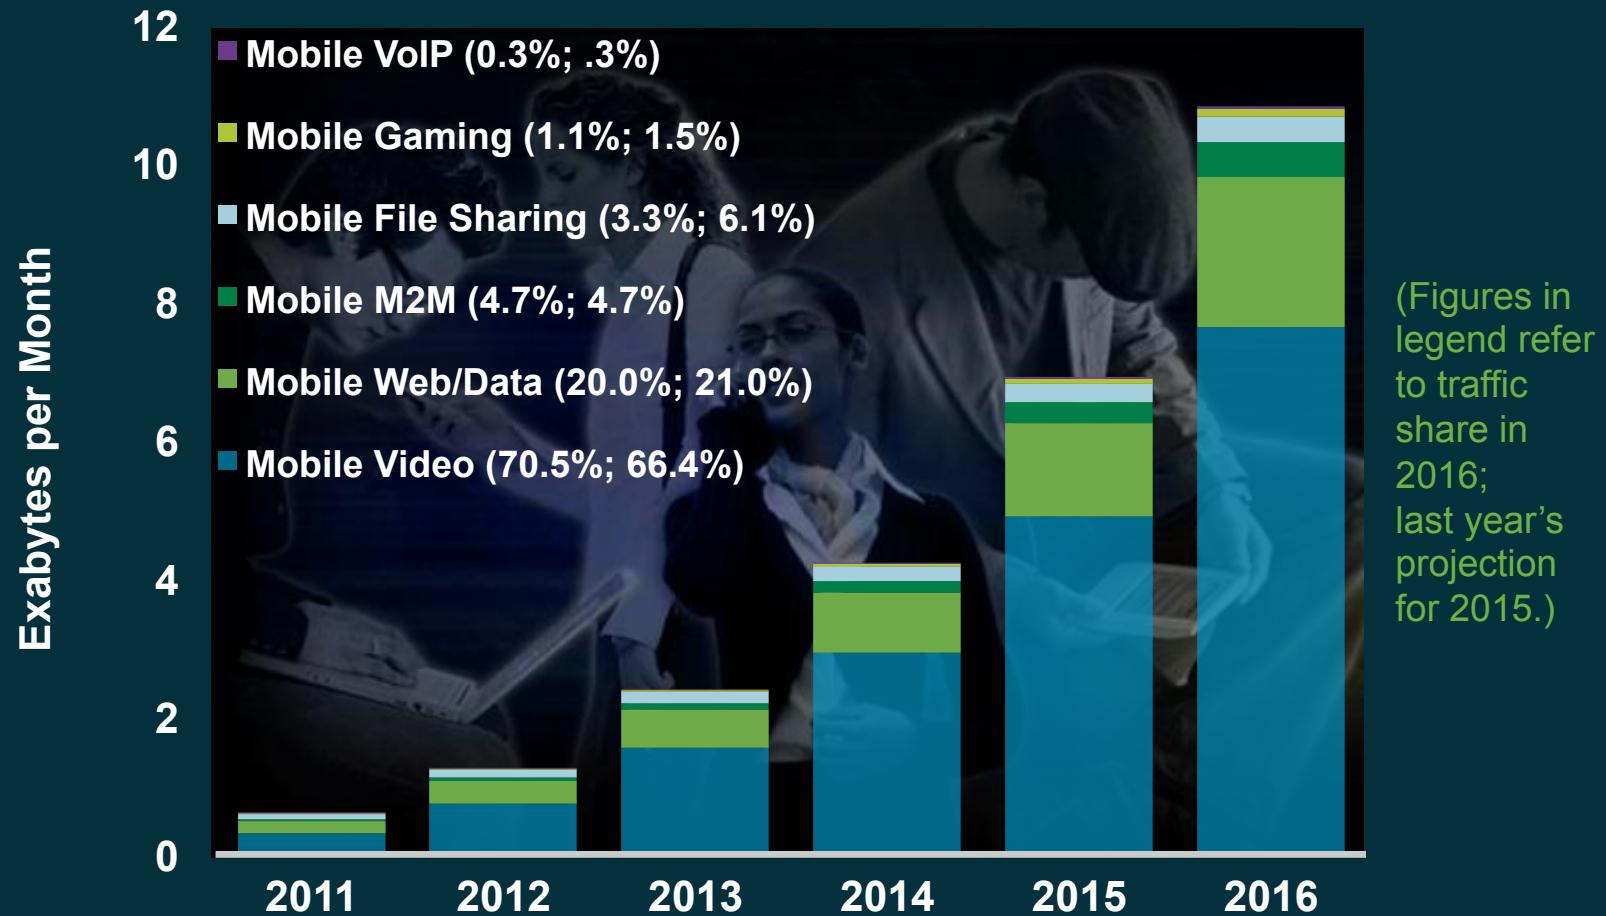

Online Gaming and VoIP forecast to be 0.79% of all consumer Internet traffic in 2015

Source: Cisco Visual Networking Index (VNI) Global IP Traffic Forecast, 2010–2015

# Global Mobile Data Traffic Growth / Apps

## Video to Exceed 70 Percent of Mobile Data Traffic in 2016

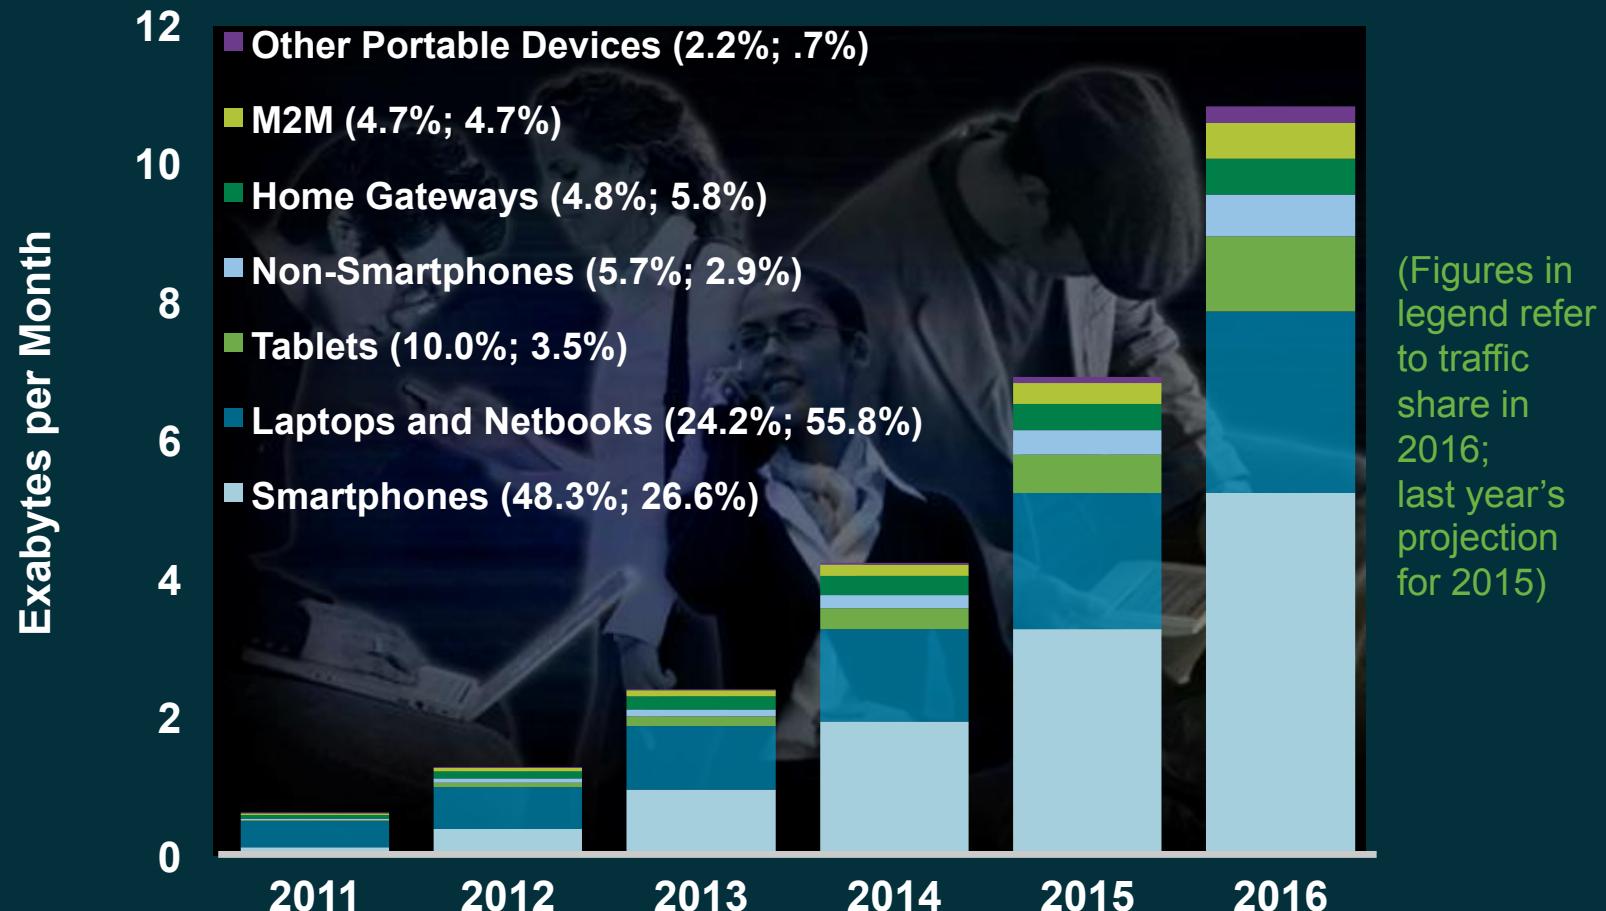

Source: Cisco Visual Networking Index (VNI) Global Mobile Data Traffic Forecast, 2011–2016

# Global Mobile Data Traffic Growth / Devices

## Laptops Dominate Today, but Smartphones Lead by 2016

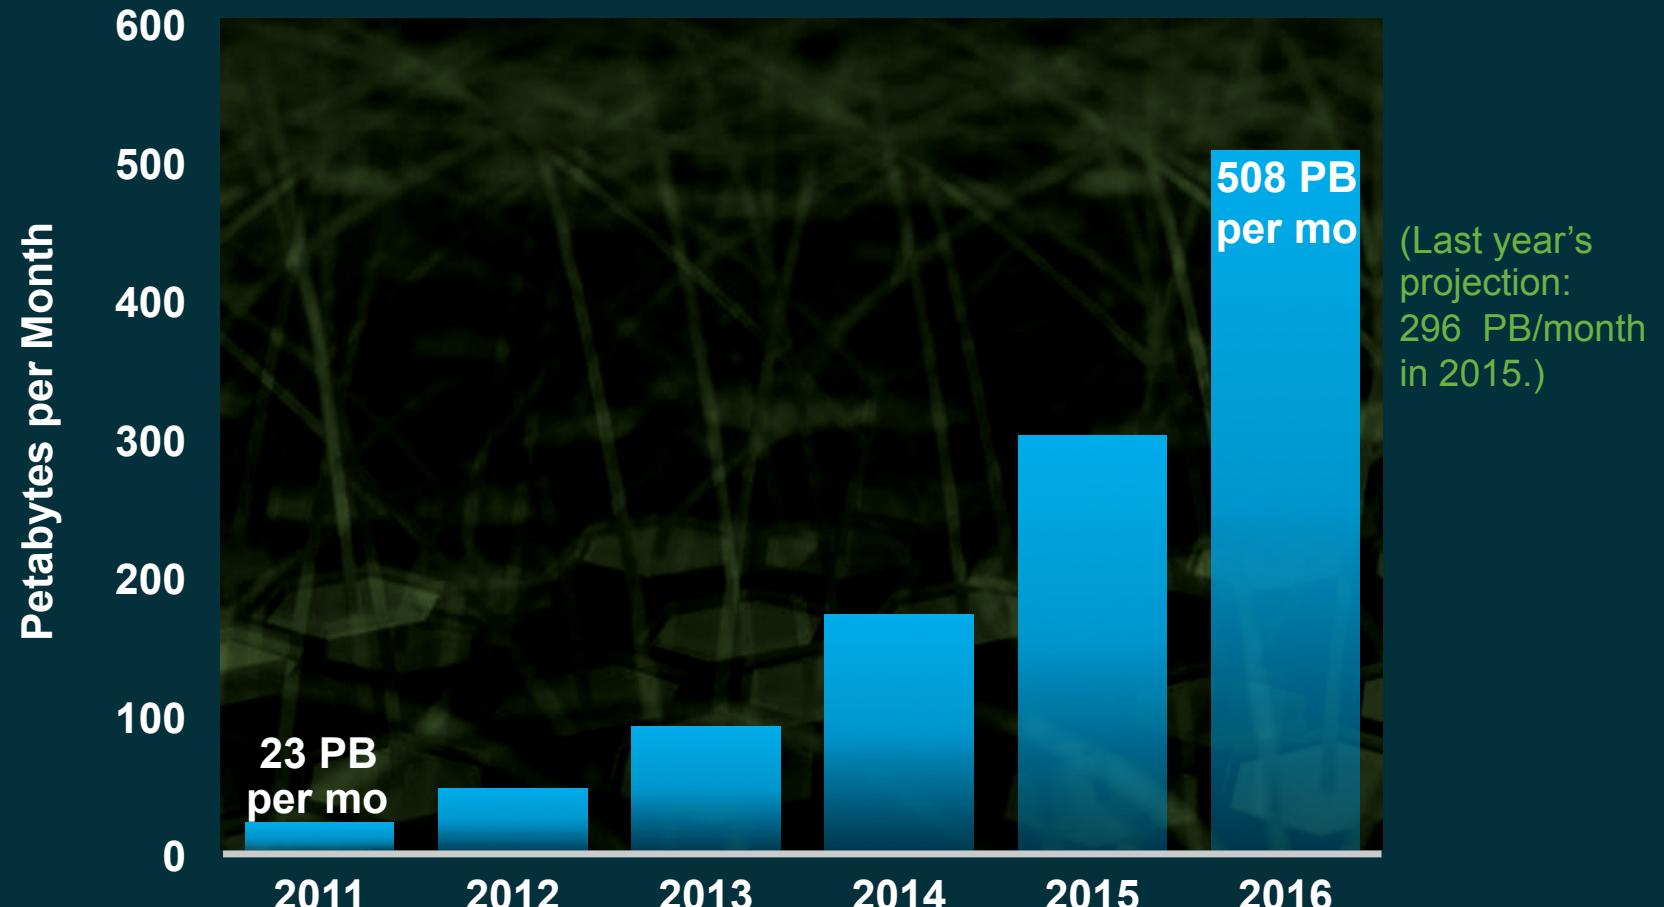

### Tablets Drive 10% of Traffic by 2016

Source: Cisco Visual Networking Index (VNI) Global Mobile Data Traffic Forecast, 2011–2016

# Machine-to-Machine Mobile Data Traffic Growth

## M2M Data Traffic will Increase 22X from 2011 to 2016

Source: Cisco Visual Networking Index (VNI) Global Mobile Data Traffic Forecast, 2011–2016

# Global IPv6-Capable Mobile Devices

By 2016, 71% of All Smartphones/Tablets Will Be IPv6-Capable

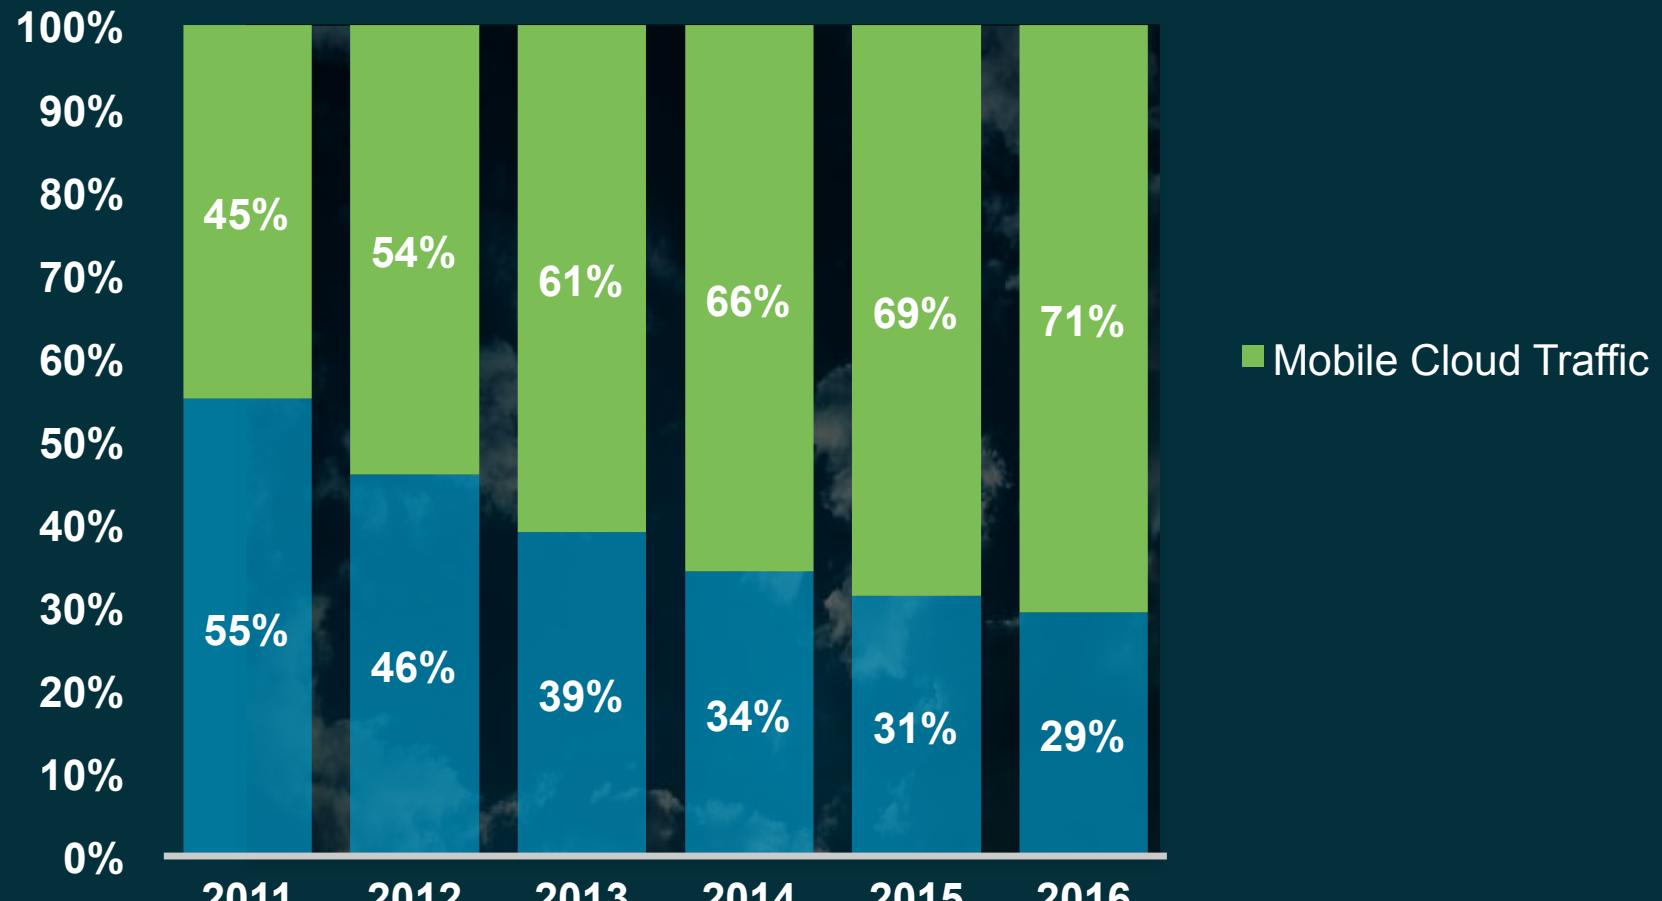

Source: Cisco Visual Networking Index (VNI) Global Mobile Data Traffic Forecast, 2011–2016

# Global Mobile Cloud Traffic

Cloud Accounted for 45% of Mobile Data Traffic in 2011

Cloud will Account for 71% of Mobile Data Traffic in 2016

# Global Cloud Readiness: Latency Matters

## Business and Consumer Applications: Network Requirements

### Basic Cloud Applications

#### Network Requirements:

Latency: Above 140 ms

### Intermediate Cloud Applications

#### Network Requirements:

Latency: 140 - 50 ms

### Advanced Cloud Applications

#### Network Requirements:

Latency: Less than 50 ms

- Text communications (email, instant messaging)
- Web browsing
- File sharing (low-resolution video)
- Web conferencing
- Social networking (basic text only)
- Stream basic video or music

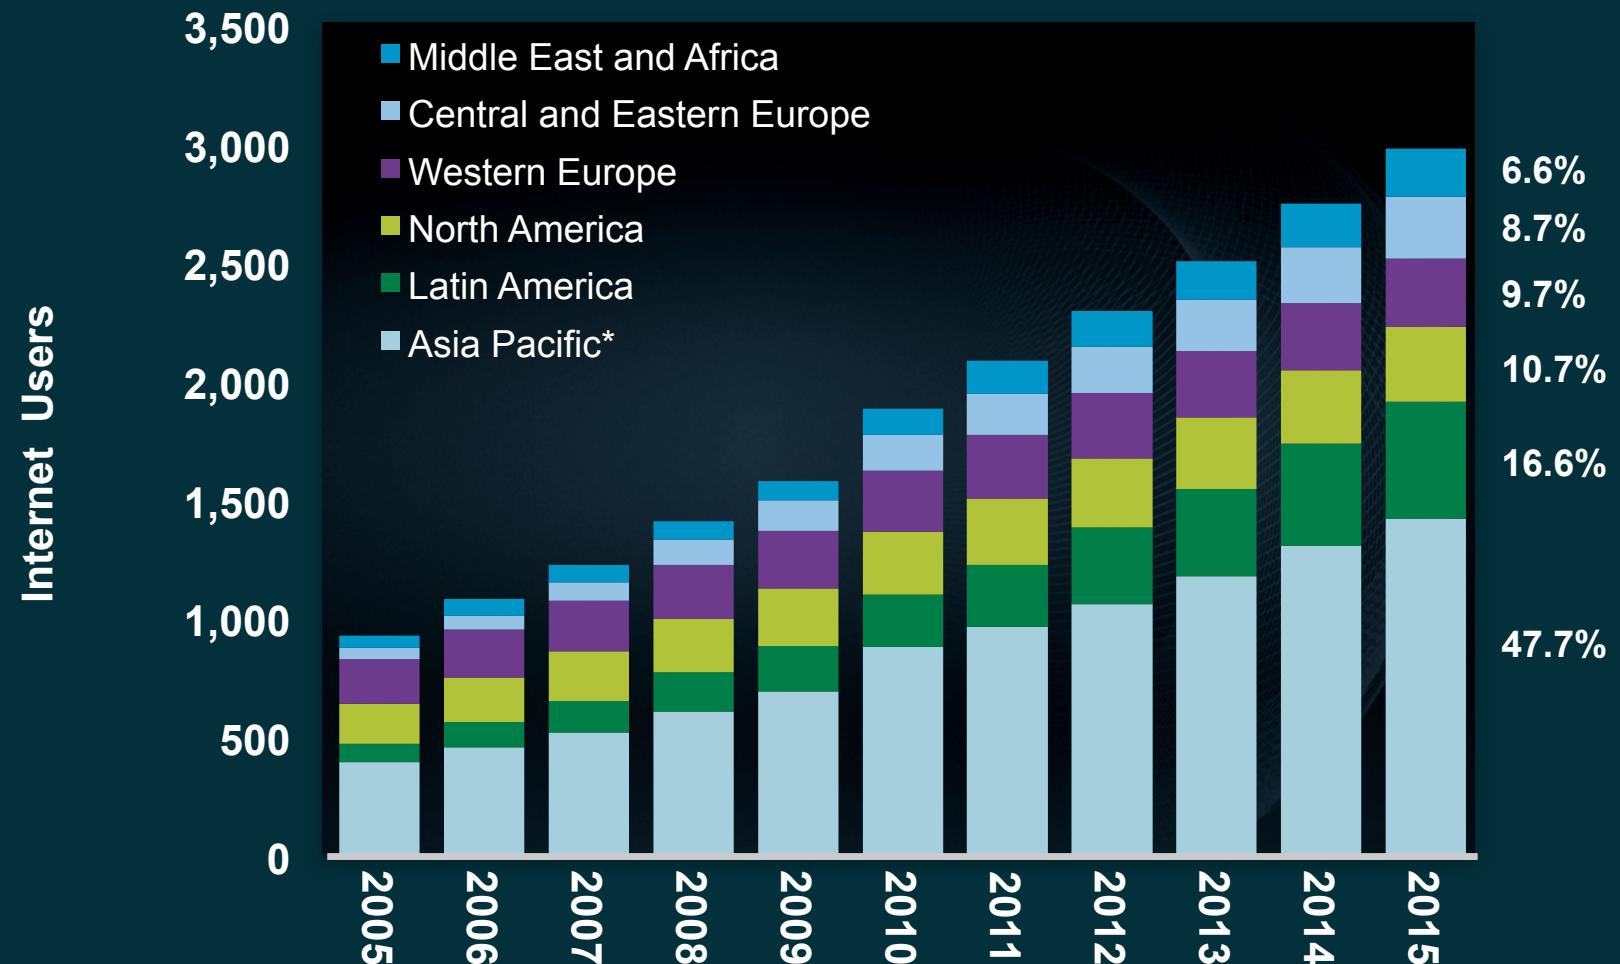

- File sharing (high-resolution video)
- IP Telephony
- ERP and CRM
- Basic gaming (single player)
- Basic video chat (low-resolution video)
- IP audio conferencing
- Basic video conferencing (low-resolution video)
- Advanced social networking (multimedia and interactivity)
- HD video streaming

- Advanced gaming (multi player)
- Advanced video chat (high-resolution video)
- Advanced file sharing (super high-resolution video)
- HD audio conferencing
- HD video conferencing (high-resolution video)
- Stream super HD video

# Regional Internet Users

By 2015, APAC will have nearly half of global Internet Users

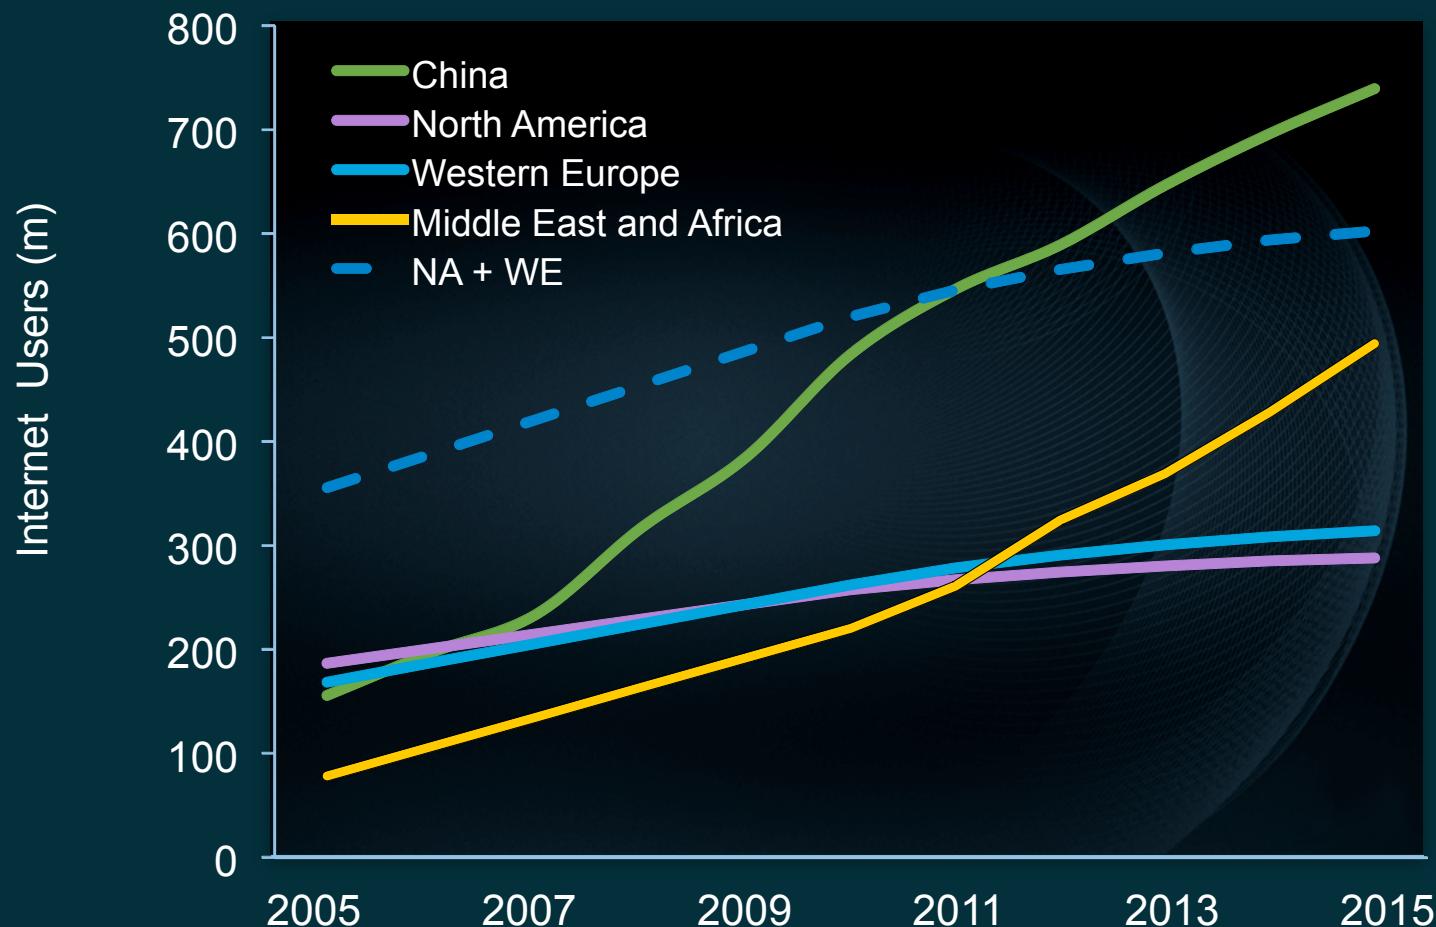

Source: Cisco Visual Networking Index (VNI) Global IP Traffic Forecast, 2010–2015

\*Asia Pacific includes Japan

# Milestones: 2006 and 2012

In 2006, China surpassed both NA and WE in Internet Users

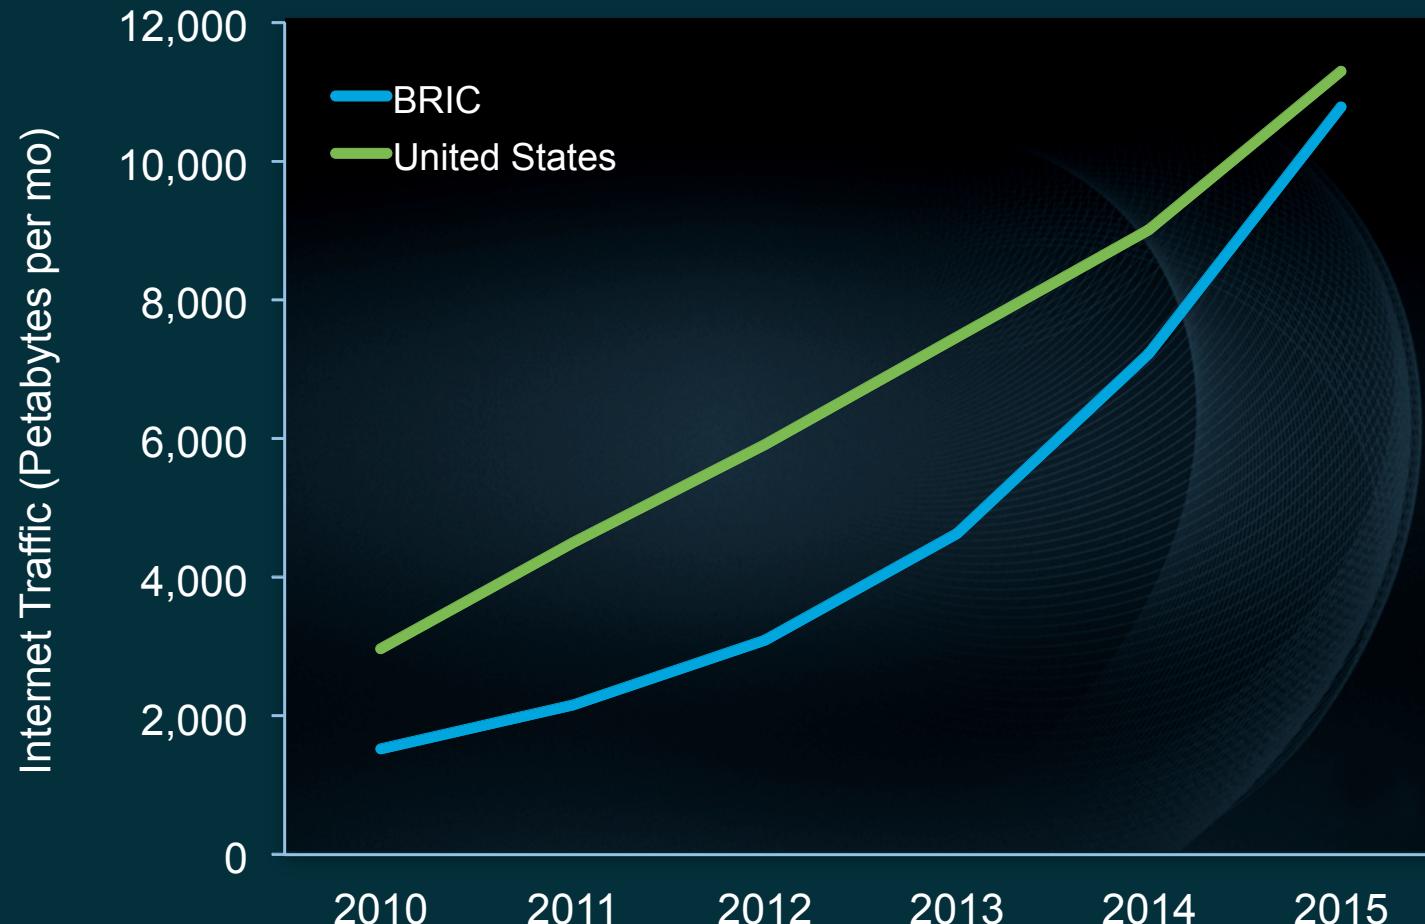

In 2012, China will surpass NA+WE and MEA will surpass NA and WE,

Source: Cisco Visual Networking Index (VNI) Global IP Traffic Forecast, 2010–2015

# Milestones: 2015

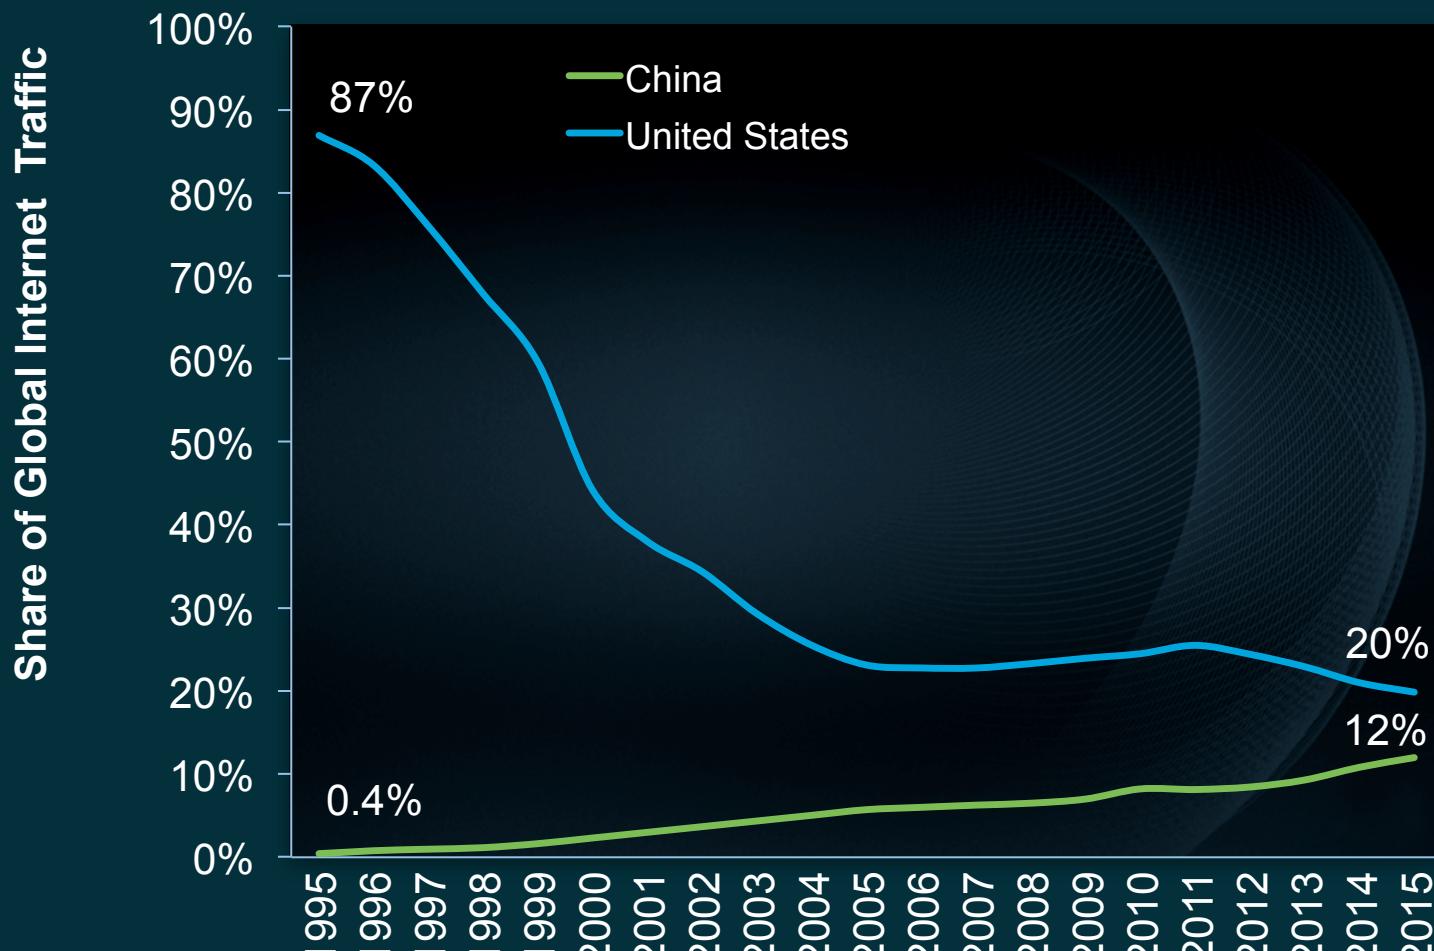

In 2015, BRIC will nearly equal the US in Consumer Internet Traffic

Source: Cisco Visual Networking Index (VNI) Global IP Traffic Forecast, 2010–2015

# US Share of Internet Traffic, Compared to China

China to reach 12% of total global Internet traffic in 2015

Source: Cisco Visual Networking Index (VNI) Global IP Traffic Forecast, 2010–2015

# Summary

- Everybody and everything will be connected
- People and devices will be consuming/generating huge amounts of data—driven by video
- Most apps will reside in the cloud
- Latency matters
- Internet even more global

Shift from West and North to East and South

Thank you.
